

## FILM INCENTIVE BC (FIBC) ELIGIBILITY CHECKLIST

The Production must be completed no later than 24 months from the end of the taxation year in which principal photography began and the Production Corporation must apply for and receive a completion certificate within 30 months from the end of the corporation's taxation year in which principal photography began.

If a completion certificate is not issued within that time period, the eligibility certificate may be revoked, no further tax credits with respect to the production will be paid and any tax credits already paid may have to be reimbursed. In addition, if the 30-month time period has elapsed and an eligibility certificate has yet to be issued with respect to the production, an application for an eligibility certificate will be denied and the Production Corporation will not be eligible to receive any FIBC tax credits with respect to the production.

To avoid these situations, it is advisable to submit your application for a completion certificate to Creative BC within 24 months of the taxation year end in which principal photography of the production began.

We recommend that you apply for an eligibility certificate as soon as you have assembled the required documentation. If you apply for the eligibility and completion certificate simultaneously, please review the requirements for both stages. If you are submitting more than one application, each application must contain its own set of documents, as set out in the checklist.

Creative BC can provide an **Interim Letter** for interim financing purposes upon request and payment of an additional administration fee of \$200 (*plus GST*). This letter will include an estimate of the tax credit(s) for which the Production would be eligible at the time of application as well as a detailed list of all documents used in our assessment. The same documents requested for the eligibility certificate are necessary to provide this letter.
