

## FILM INCENTIVE BC (FIBC) COMPLETION CHECKLIST

The Production must be completed no later than 24 months from the end of the taxation year in which principal photography began and the Production Corporation must apply for and receive a completion certificate within 30 months from the end of the corporation's taxation year in which principal photography began.

If a completion certificate is not issued within that time period, the eligibility certificate may be revoked, no further tax credits with respect to the production will be paid and any tax credits already paid may have to be reimbursed. In addition, if the 30-month time period has elapsed and an eligibility certificate has yet to be issued with respect to the production, an application for an eligibility certificate will be denied and the Production Corporation will not be eligible to receive any FIBC tax credits with respect to the production.

To avoid these situations, it is advisable to submit your application for a completion certificate to Creative BC within 24 months of the taxation year end in which principal photography of the production began.
