

# Clean Energy | Get Involved

British Columbia's motion picture industry is committed to pursuing options for clean energy to support production needs and allow for greener practices. Understand the ways you can get involved and get clean energy on your production.

## General EV Vehicle Information

We strongly encourage on the ground crew members, stakeholders, vendors, and studios to educate themselves on the different types of EV's available and the infrastructure needed to support their use.

## EV Charging Location Maps

Providing QR codes or links on call sheets to EV charging sites can help with the logistics of making the switch to EV vehicles for both fleet and crew vehicles.

## EV Chargers Funding

If you own a property that has capacity to provide EV charging infrastructure ( both Level 2 or Level 3) we encourage exploring the feasibility of these sites and considering the rebates and benefits of having available chargers for use by the motion picture industry.

## EV Vehicles Funding

Switching over to EV vehicles as part of your fleet is a huge step towards reducing the use of fossil fuels. Vendors and 3<sup>rd</sup> party contractors can explore the potential for rebates associated with making the switch.

## Alternative Fuels and Energy Sources

[Renewable Natural Gas](#)

[Renewable Diesel](#)

## Hybridization of Energy Sources

On the ground crew members can get involved by thinking outside the box when it comes to using fossil fuels.
